STATIONERS. 1681.

## Epistle to the Readers

Gentlemen,

**B**ESIDES the several portentous Prodigies mention'd at the latter end of this Book, there are two others have lately happened, viz.

I. The first was the dark Sunday, January 12. 1679. On which day it was bruited about for a Truth, that Sir Edmond Godfrey did appear to several. Whereas he (poor Gentleman!) was laid too low by wicked hands, to rise again, until the sound of the last Trump, when all his Assassins shall surely rise with him, and confess their Crime.

This Darknes happened between 10 and 12 a clock at Noon and was caused by the ☿ being then in ♄ ♋ in 18<sup>th</sup> sec. Lat. and the same Cause happens once every Month, though not so eminently notorious. For it's observable, that then the Air was greatly disposed to Clouds, with Cold, Snow and Rain; all which made the Darknes the more perceptible and amazing. And though the same Cause do fall out Monthly, yet it is not ever attended with a cloudy Air, &c. neither doth it happen always in the day time, or on a Sunday, and in Divine Service. Nay, it is to be further considered, that the part of the Zodiack in which this ♄ ♋ fell, is observed for one of the foul holes of Heaven, whereat the learned in Meteorology have set up their Mark. Of which see more in a Discourse thereof Printed, before my last twenty years Ephemerides, lately published.

II. The second was, The great Hail-Storm which fell on May 18, last Year, — and the Night before, (accompanied with great Thunder, &c.) some whereof were 7 or 8 Inches about, as my self saw. But though this great  
Hail,

Hail, &c. was unusual, yet it was Natural, and had a Cause in the Heavens. Many deem'd them Ominous, and so perhaps they may prove, although they had a natural Cause. I must confess never to have seen the like before. Yet, to shew you that the thing was not miraculous, (for our Ignorance ought not to make Miracles, though it often do so.) I will acquaint you when the like Storms of Hail have formerly happen'd.

I. Anno 1545. on June 25. Stow tells us, that Hail-stones fell in Lancashire as big as Mens Fists, and that they had divers prints in them: some like unto Men's Faces, others like unto Gun-boles, &c.

II. Anno 1575. July 30. P. M. Great Tempests of Thunder and Lightning, with Hail-stones in many places of 6 or 7 Inches about, which strook many Men and Beasts dead.

III. Anno 1600. on ♀ July 16. at Ryffe, and other Towns in Norfolk, a great storm of Hail fell, doing much harm. The Hail-stones as big as Walnuts. And they were taken up on ♀ following by handfuls, then wasted to the bigness of Hazle Nuts.

Nay, I find news of another Prodigy, affirmed by the Gazette, and otherways, from Ulster in the Kingdom of Ireland, viz. That on ♀ June 26, last Year, there happen'd great Flouds doing much harm, and accompanied with an Earth-quake, which tore a Mountain in above ten several places, destroying abundance of Cattell, and about fifty several Persons. And, can ye not discern the Signs of the Times?

Gentlemen, I am,

Brick-Court by the  
Deans-yard, Westm.

Your Servant, and Volary,

JOHN GADBURY.

Good is the Law ; and to do Good design'd :  
 If its Executors for Gain shall grind  
 The Face of Justice, and oppress the Poor ;  
 There is another Law for them in Store.

Which neither Judg nor Jury can withstand,  
 No Writs of Error frustrate Heaven's Hand !

*Anima Legis ratio.*

*Ergo, — Ab aliis speres, alteri quod feceris.*

# January hath XXXI days:

At the beginning of th' ensuing Year;  
 The Sons of *Phabus* gloriously appear ;  
 Bright *Sol's* saluted by great *Mars* and *Jove*,  
 And his *Dispositer* by th' *Queen of Love*  
 Is likewise Trined. Whence most surely springs,  
 Honour, Content, Obedience unto KING S.

January, 1681.

Last quarter the 1st day, at 4 afternoon.  
 New moon the 9 day, at 8 at night.  
 First quarter the 17 day, at 3 in the morning.  
 Full moon the 23 day, at 11 at night.  
 Last quarter 31 day, at Noon.

Astrological Observations.

*Exurgat Deus, dissipentur Inimici.*

An *Apertio Portarum* begins the Year as to the Weather ; but I hope the contrary as to mundane Actions, because four Planets are in humane Signs. — Let Justice, Piety, and Charity be still the happy New-years-gift to this Nation, and Honour and Success such to the most merciful Sovereign thereof ; and then no Plots against either can prosper. — *Mars* and *Jove* trine the *Sun*, and none but unquiet Spirits will provoke the Magistrate to use his power severely. The pretence of Passive Obedience is too stale a cheat to be any longer swallowed. The Law was made to be obeyed, not to be opposed by a pretence of Suffering. And Traitors, Thieves, and Murtherers, when punish'd for their misdeeds, are as passively obedient as the Non-conforming-Brother. — The slow motion of ♂ and ♀ intimate some great Affairs, Southward, at a stand : yet their Δ and reception, &c. promise a conquering of all difficulties. — The ♂♂ ♀ shews a great Lady a little too negligent of her Honour, — The Merchant thrives. Princes, and Men in Authority, like good *Samaritans*, find sundry ways to heal the Breaches of some late disturbed Nations.

♂ in ♀ from Octob. 29, 1680. to Jun. 21 1681. is a transit of no mean signification to *Virginian* Persons and Nations. If *Paris*, and sundry other Countries of *France* be under ♀ the angry Atoms seem to tend that way. Anno. 1649. ♂ had the like tedious Progress through ♀. By the History of those times, you may guess what he will produce in these.—♀ in ♀ elevates the Genius of *England*, and gives her a power over her Forreign as well as Domestic Enemies, whereby her Peace is secured. Some Learned Persons meet Honour and Preferment, but the ♂'s of ☉ ♂ & ♀ turn many out of their places for tricks of Craft and Improbability; and gives notice of designs against some great Person or Persons, who happily discover the Actors.—Let *Mercury* have a care of *Mars's* Councils; they are like to prove as bad as *Nus*. ☿ Eclipsed *Vomica*, and will probably fetch up abundance of filthy treacherous Stuff, that may make some mad-Men's *Candles burn Blew*, as at the apparition of Spirits. An eminent Female lately under some disadvantages, appears gloriously again; and is more courted, than before neglected.

March hath XXXI days.

*Jove* in the *Twins* (though weak) receives support  
From Citizens, and great ones at the Court;  
But *Majors* cast's a seeming friendly Ray,  
And *Chronus* strives such kindness to allay.

Beware of both their Favours; for ye know,  
Fox-like pretences cozen'd the poor Crow.

March, 1681.

Last quarter 2 day, at 10 morning.

New Moon 10 day, at 1 morning.

First quarter 16 day, at 7 night.

Full Moon the 24 day, at 2 morning.

Astrological Observations.

The Lunar Eclipse of the last Month begins to operate, and betokens much prejudice to attend Mercurialists, Secretaries, Advocates, Accomptants, Treasurers, &c. An invisible Eclipse of ☉ in the beginning of ♊ and ♋ in the same Sign in ☐ h, occasions many Scandals, &c. against Men in great Place and Authority, many dirty Libels are Printed and Promoted, busy Brains are at work in earnest. Let us beware of pretended Friends: He that would discover a Sycophant or false Friend, must (with *Boccalini*) let him, like an Oyster, stew in his own Liquor. Some great Clergy-Man, or Civilian advanced to eminent Honour, who meets with many Enemies to thwart his hopes, but such *remora's* are vigorously removed.—When the *Sun* and *Jupiter* combine in Friendship, a debilitated *Saturn*, and a Retrograde *Mars*, i. e. the envious and stubborn Enemies may snarle and grumble thereat, but they shall never be able to break it.

*Pax est dulcissima rerum.*

# April hath XXX days.

Bright *Hesperus* in th' Evening guilds the Skies,  
And in the *Twins*, with *Jove* doth set and rise.  
Twice six years since she was so plac'd; and then  
Much Happines attended *Englisb* Men.

If like Effects do from like Causes come,  
We shall be blest'd with beauteous Peace at home.

April is usher'd in with a friendly Con-  
 junction of the benefick Stars in *Gemini*,  
 rendring a brisk Trade, and much happi-  
 ness of all kinds to the *Twin-City*, who  
 begins now to be rid of her Sons of Dis-  
 content, and finds Loyalty to be a Blef-  
 sing. ♀ in △ ☉, declares the Souldier  
 active, and favours some eminent, vali-  
 ant, and witty Warlike Commander,  
 with great Success, whereby he encreases  
 in Honour, &c. *Mercury* Retrograde and  
 combust in the dull and earthy Sign *Tau-*  
*rus*, shews the troubled condition of ma-  
 ny Officers of the Law, or Customs, or  
 belonging to Cities, or the Courts of  
 Princes, &c. that they shall be subject  
 not only to Rebukes and Reproofs for  
 their misdeeds, but to the loss of their  
 Places also. — Good News from the  
 North-western parts of the World: the  
 Noble *Jamaicans* are in a very prospe-  
 rous condition; and, by a gentle Sympathy  
 must ever thrive when *London* meets good  
 Fortune. Would you know the reason  
 thereof? consult the Nativity of that  
 gallant Island, as it is published in my  
*Jamaica Almanack* for 1673, and there-  
 in you may receive satisfaction.

May hath XXXI days.

**May** is a pleasant Month, and gentle Winds  
With Showers, refresh the Spring. And could Mens Minds  
But quiet be, how happy might they live?  
Enjoy their Conscience! In their Pockets thrive!  
'Till Nick'd, some n'er dread danger, yet let's know,  
Such as rowle Lions, must unto them bow.

# Astrological Observations.

The Planets are at much friendship, and ♄ in ♀ recovers the *Twin-City* from the *Ricketty Fate* it hath long labour'd under. Many *Agents* and *Ambassadors* seem to Court His Sacred Majesty of *Great Britain* for Friendship; who is now happy in his *Domestick Concerns*, as well as his *Foreign*. At the latter end of the Month the ☿ ☽ shews *discontented persons* are now wanting to kindle *commotions*; but Justice is Eagle-ey'd, and they are assuredly met withal. For *Hermes* in the *Bull* makes but blundering-unsuccessful-Plotters, viz. such as can never weave Tissu'd Honours for their party (which they all expect) but large *Nets* rather to intangle themselves and it. God preserve us from dangers by *Fire*, *Lightning* and *Thunder*; and bless the *Sons* of the *Twins* and *Virgin*, from the *Fatal evils* that usually attend on *Duelling*. Let *Luna* in *Pisces*, in *Trine* and reception of *Venus* ever influence the 29th. of *May*, and *England* will be always a happy Nation.

June hath XXX Days.

*Majors Squares Hermes, and mild Jupiter.  
The Gown's Confronted by the Man of war.  
Hermes at home too ! but hath Jove for Friend,  
And unto's Council doth devoutly bend.  
He, would be safe from Envy, must be sure,  
To make a Friend of Sol and Jupiter.*

A notable active Month, as well in Courts and Cities, as in Camps; and two Thirds thereof begets Fortunate Councils, & discovers many private frauds, whence divers are discarded their Commands and Employments. The Sycophant is very officious, and doth some injury to men of Honour and Integrity; but we hope not much. Mars leaves Virgo, and a Warlike Prince of Emperor loseth ground, Non-obstante all his late stupendious successes. Some fear of a sickly season. The Gall confronts the Liver, and the Spleen and Gall both offend the Brain. Many Ships richly laden arrive from the North-westward; and much and various news from several parts. I hope no new advance of the Turks against Christendoms. ----- Lord God! into what a sad Condition is poor Europe Plunged! can nothing quiet our Christian Divisions, but the terrour of a Mahometan Force! Shall Christians still contend, and like the Frog and Mouse in the Fable, advance against each other, till the Kite sweeps away both?

Deus avertat Judicium.

B 2

July hath XXXI Days.

Bright Jove in Cancer would his beams combine  
With splendid Venus, but she doth refrain.  
Chronus disturbeth Sol; the Scordid Clown  
Doth Passion raise in some of high renown.

The *Air* is troubled, so are *Nations* too,  
(Under the *Crab*) at what their *Betters* do.

Saturn join'd to the Sun in Cancer, will produce cloudy weather, and much Melancholly in the breasts of some great Persons; and procures also great trouble and disturbance to divers Societies, possibly to the restraining, if not vacating some Charter or charters, &c. But the swift application of Mercury to Mars, Venus and Jupiter clears up many cloudy matters or businesses.----Let Chronos change his sign, and strive to instill his Crocodil's influence upon the Sons of the Lion, who will bravely requite his treacheries and dissimulations. Albeit, his Transit thither will make room for the effects of his Triple Conjunction with Jupiter now shortly approaching ---- Some eminent elderly clergy-man, or Civilian, grown weary of this world, by a tedious lingering disease, is hastning to a Better. -----Consumption, Stone, Dropsie, Gout, Scurvy, &c. do now period the days of many elderly persons. Several also die suddenly. From which and all other evils--

Libera Nos Domine.

# August hath XXXI Days.

Grim Chronus, Mars doth square ; Mars hath the Odds.

Cripples should not contend with Demi-Gods !

The Moon's Eclipsed in the House of Jove,

Who kindly now doth Court Europa's Love.

Luna hath her Endymion ! else 'twere strange ;

Thus Humane Nature still's inclin'd to change.

The Fiery Planet *Mars* now enters the *Celestial Scorpion*, & thence meets a hostile *Quartile* of *Saturn*.----*Moloch* must be sacrificed unto as long as the *World* endures; though not at all times alike. The *Sun* casts a *Sextile* to *Mars* from *Capricorn* a humane Sign, and the worthy *Magistrate*, (who bears not the *Sword* in vain) is careful that neither *Natural* nor *Moral* mischiefs get ground. *Mythologists* tell us, That *men* were sacrificed to *Mars*, to declare the sad effects of *War*.-----The thoughts whereof should methinks terrifie *Christians* from *Destructive Plots* and *contrivances*. Let *Mars* be worshipped at *Lemnos*, but not in *London*, and let not *Englishmen* be so much like to *Scythians*, as to delight in *war* and *violence*.-----The *Eclipsed Moon* in *Pisces* bodes prejudice to *Religion*, and to the *Pious Clergy*; but the effects do not operate yet. Great hopes of a good *Haruest-Month*, and *Corn* grows very cheap, if our *mutmurings* against *Gods Blessings*, prevents not.

# September hath XXX Days.

*Phœbus Eclips'd, September's second Day,*  
*Foretell's both Plague and Famine, (Sages say.)*  
*Great Droughts, Seditions among morral men;*  
*Being in Virgo, a Terrestrial Sign.*

*Sated with peace and plenty; Fear we may,*  
*Gods Sharper Judgments should sweep both away.*

As the Stars in their courses fought against  
 Sifera, so they do now against some Vir-  
 ginian Countries. Else, what means ☉ so  
 long in ♀? and that so suddenly after  
 Mars his tedious transit through that Ty-  
 rene Sign? You may find what Kingdoms  
 and Cities are under ♀, in fol. 85. of my  
 Doctrine of Nativities. England is none of  
 them, and I am glad of that. ☉ is said  
 to have once stollen ♂ his Sword. But how-  
 ever they quarrel'd formerly they both  
 unite now, to do mischief. Many notable  
 projects, devices, designs, (I hope no more  
 damnable Hellish Plots.) Treacheries, dis-  
 placing of many in eminent Offices or Em-  
 ployments. Many Merchants and Bankers  
 (who have screw'd their Pegs too high)  
 are in danger of great losses, if not utter  
 ruin, neer these times ---- A discontented  
 tribe delight in doing mischief, but they  
 are met withal, and punished.

----Fiat Justitia, ruat Cælum.

# October hath XXXI Day.

Saturn and Jupiter, both square the Sun.  
 Some *lofty Cedars* bow, some *small ones* run.  
 North-East from England, th' angry Scene is laid,  
 And many in great Places are betray'd  
 By them they feed. The Genius of the Times  
 Makes good mens Charity their greatest Crimes.

# Astrological Observations.

The *Sun* suffer'd an *Eclipse* the last month, and in this he is in ☐ of *envious Saturn*, many are the *affronts* that are put upon *Magistrates*, and the *Actions* of our *Superiors* are much (though unjustly) *murmured* against.---Sundry *seditions spirits*, who have been long working wickedness *clandestinely*, are now *discover'd* and *rewarded*.---*Jupiter* in ☉ in \* of benevolent ♀, renders the 14 day of this *Month* gloriously *prosperous*; and will make all the *Harry Hot-spurs* that were of late so *zealous* against it, glad to sit quietly in corners, and mumble out their *discontents* to one another,---The *Magnates* of the *World* should now have a care they do not (in a *Pythagorean* sense) *entertain Swallows* into their *Houses*: (i.e.) men of *unthankful* natures, who will be apt to turn *Spies* upon their *words* and *actions*. *Ingratitude* is in fashion. And sundry *worthless* persons now, (as not long since), *requite* their *Benefactors* ill. But let such know, that *Frost* and *fraudulent treacherous practices* come to a *foul end*; and they that *sow the wind*, do commonly *reap the Whirlwind*.

# November hath XXX Days.

The two *Supervisors* in this Month retreat,  
 And *Mars* doth to his *Exaltation* get.  
 Some great ones die, and *Charters* forfeited:  
 Good *Laws* reviv'd: [God grant they be obey'd!]  
*Chronus* and *Jove* do both ease the *Sun*;  
 And *Hermes* shews some *Active Clerks* undone.

The two Superiour Planets go Retrograde, and the third changes his Sign. Great Councils North-Eastward at a stand, and divers disturbances given to Authority. Soldiers retire into their Winter Quarters willingly. Alterations in Armies, and sundry new Officers made, with new Governors of Cities, &c. *Regina* no sooner quits her Sign, but meets a ☐ of Retrograde h. What jealous-headed *Silicernium* doth now endeavour the ruin of a beautiful young lady? if she be so soft as to be led by the nose with trashy promises, let her suffer for it a little: but [Good *Chronus*!] not too much. The ♀ of *U* ♂ denotes many Duels, &c. and hot spirited persons cast many unjust reflections upon the Reverend Clergy, but *Sol* in ♀ in △ of h in ♀, preserves the Honour of Religion, and Religious Persons 'Tis well for some, that Church Censures are not in fashion. But angry ♂ must know that ♀ is his preserver. And were there not (as a learned person well observes) a Minister in every Parish, we should quicky find cause to increase the number of Constables. But, *Veritas Odium parit*.

# December hath XXXI Days.

*Hermes* two Months in *Sagittary*, would  
Some secret frauds of *Pious Cheats* unfold,  
But fears he can't be heard. *Jove* and the *Sun*,  
Do meet in hostile *Opposition*.

When angry *Atoms* make tall *Cedars* clash,  
The *Backs* of *Shrubs* do often feel the *lash*.

# Astrological Observations

A mild *Air*, and gentle *Allions* begin the Month,  $\pi$  and  $\eta$  are in  $\Delta$  of each other; and  $\eta$  after a tedious Transit in  $\gamma$  is gotten direct.----But what makes Retrograde  $\pi$  oppose  $\odot$ ? The *Rabby-busies* of the Age are contriving how to *censure*, if not to *oppose* the actions of their *Superiors*. But let such giddy *Zealots* know, that they who dare to *contemn* and *confront* Authority, will meet with most *severe reproof*, if not *destruction*, or deprivation of the *Felicities* they at the present possess. And none but a *Vulcan* thrown from Heaven, can hope to fall upon his feet.----The late repining *Merchant* begins to look *merrily*, and is pleased with his happy returns -----God preserve his *Majesty* and the Church of *Great Britain*, &c. and defend him and us from any more such *Horrid* and *Damnable* Plots, as of late years most strangely afflicted the *Nation*. And let all true *Englishmen*, Fear God and Honour the King, and maddie not with them that are given to change.

Britannia abjunctio mundi semper fuit Regia, & Regimen illius simile illi Coelorum.

A brief Account of some Prodigies that have of late years  
been visible in Great-Britain.

**G**OD, who at sundry times and in divers manners spake in times past unto the Fathers by the Prophets, hath in these last days spoke unto us by his Son, Hebr. 1. Which Son of his (our blessed Lord and Redeemer) hath truly prophesied, That before the great and terrible day of the Lord come, there shall be signs in the Sun, and in the Moon, and in the Stars; and upon the earth distress of Nations, with perplexity, the Sea and the waves roaring; mens hearts failing them for fear, and for looking after those things which are coming on the earth. For the powers of Heaven shall be shaken, Luk. 21. 25. By which words our blessed Saviour doth seem to confirm the Prophecy of the Prophet Joel, viz. I will shew wonders in the Heavens, and in the earth, blood and fire, and pillars of smoke; the Sun shall be turn'd into darkness, and the Moon into blood, before the great and terrible day of the Lord come, Joel 2. 30, 31.

I would not be thought either *Millenary*, or *Enthusiast*, *Dreamer*, or *Madman*, when I mention any thing touching the end of the world. Nor do I presume in the least to determine the same, or have I any *Astrological* or *Philosophical* grounds to assist me in so *stupendous* and profound a conjecture. For the blessed Jesus himself (who could speak nothing but Truth) hath breathed forth this cardinal and uncontrollable verity, That---of that day and hour knoweth no man! And for me (that am but the meanest of dust and ashes) to pretend to conclude its certainty as to humane cognition, would be convincible and statute-madness; and I should thereby demonstrate my self to stand greatly in need of *Heaven*. Yet (with favour) I may a little consider of the aforesaid Text, it naturally leading me unto what I shall say by and by.

Some Interpreters understand this Text of St. Luke, to intimate that the like evils should befall the Roman Empire, which had before happen'd unto the Jews. And some again do understand it literally, and to be fulfilled a little before the last day.

Which

Which others are pleased to contradict, because (say they) *the last day useth not to be so described, but by fire; as in 1 Per. 3. 12. Some others suppose a certainty of some wonderful change to be thereby only intended, and not the nearness of time thereof, wherein such change shall happen. Thus in favour somewhat of this later opinion, History acquaints us, that after the Death of our blessed Saviour, it was about forty years before Jerusalem was destroyed.*

Howbeit, I will not presume to affirm which opinion of these is the truth; nor yet, whether all of them may not be said to be true, in some sense; but looking upon, and esteeming these presages of our Lord and Saviour to be eternal truths, I conceive them to be ever in use, and for ever to remain so, as long as the Sun and Moon endureth. And when it pleaseth God to make any eminent alterations in Nations, Kingdoms or Countrys, he vouchsafes to give notice thereof by sending such signs as messengers to awaken the sleepy world out of its Lethargy, unto a sense of the sins it hath committed against his Divine Majesty; that Humanity may not murmur against God, nor yet have any pretence of ground whereon to implead his Justice, for striking before he gives fair warning.

Hence it was that *Herodotus* wrote, *Cum Deus puniturus, &c.* When God intends to punish a Nation or People, he is first wont to give them notice thereof by Prodigies.

Seemable hereunto was seen before the taking of Jerusalem, for forty days together, Horsemen running in the air, with robes of gold, and as bands of Spearmen; and as troops of Horsemen set in array, encountering and coursing one against another, with shaking of arrows, and the glittering of the golden armour seen, and harness of all sorts. Wherefore every man judged that these tokens might turn to good, 2 Maccab. 5. 2, 3, 4.

And will it not be the duty of Christians also to consider, whether they can promise themselves more security, than a greater priviledg in respect of their sinning against God than these Jews could? And whether we have not as much reason to believe that the Immortal Deities have as great a contriver-

lie with us, as formerly they had with *Jerusalem, Niniveh, Babylon, &c.* such as tokens manifest of the *Divine displeasure* against us, we have had (and but of late too) such a variety of *Prodigies* to appear and be visible among us. A short account whereof, I think it very pertinent in this place to remember our *British* world of, viz.

1. And that I may go no further back than *Anno 1677*, let it be remembered that on *April* the 19 in that year, a *Comet* appear'd in *Taurus* and *Aries*, which was more visible in the *West-Indies*, than in *England*; of which I gave the world an account in my *Ephemeris* of 1679, unto which I refer you.

*Μηδ' οὐρανὸς ὄρεϊ κ' ἀνδρὶ σέβας; i.e.*  
The Earth in vain did never gaze,  
When Comets in the Heavens blaze.

2. About the beginning of the said Month of *April 1677*, *Si N.* an Earthquake hapned at *Poitiers* in *France*. Can the Earth which is our *Indulgent Mother*, shake and tremble, and shall not sinful mankind hear and be sensible?

3. On *April* the 13 day, *Anno 1678*, A Monster was born at *Brantz*, it was a Female-child with two heads and necks, with eyes, nose, ears, and mouth very perfect, on each Face and Head; and the body all the members (otherwise) perfect. And since this monstrous humane birth, have we not had almost numberless monstrous inhumane-brutish-actions, &c. visible among us? And not only among us in these *British* Islands, but in *France*, and other places likewise. As if Nature observed a method in every thing; and that such monstrous productions in Humane Generation, were ever to be attended with the like amazing interruptions in *Morals* also. Nay, it's observable, that the *Bellish* consult was held on *April* 24, at the *White-horse Tavern* in the Strand: viz. but eleven days after the birth of this Prodigy. And the strange Plottings (yes, Plottings upon Plottings), we have had in *England* since that time, and the unheard of Poisonings in *France*, the whole world cannot but fully remember, as indeed it hath cause.

4. On *October* the 10th. day, 1678, Three comets and a Rain-bow

bow were seen in Berkshire. And nigh about the same time, a great Sword-Fish came up to Woolwich, which was from thence brought to London, and lodg'd at the Wool-staple, Westminster, where my self (with some others) saw it. It was about three yards in length, Sword and all. And have we not had among us since that time, men of restless and unquiet spirits, (of as desperate minds as Fortunes) that have used all arts and stratagems to usher the sword in among us? Nay, so bold have some men been since that time, that an Inconsiderable Bookseller, (since Pillory'd for it) was so confident as to boast, That he had his Thousands to stand by him, and defend him in his Printing of Seditious Libels against the Government and Laws, to inflame the Kingdom.

5. Upon November the fifth day, 1678. about eight hours P.M. I saw the glorious Planet Jupiter for half an hour together,

thus enclosed,  $\star \Psi$ , and then the Enclosure vanished. I

observed that  $\Psi$  was thus guarded in the Midheaven; as if Regal Authority should support and protect Religion, and true piety among us; and the rather, for that  $\Psi$  was then in  $\Delta$  of  $\odot$ , and Prodigies do sometimes betoken good to mankind, as you may read in the Maccabees, &c. though generally they declare the contrary.

6. On the sixth day of January, 1679, Two Moons were seen at Lempster in the County of Hereford. An account whereof I gave in my Ephemeris of the last year.

7. Upon March the 2, 1679, There were strange and unusual apparitions seen in Ireland in the County of Tipperary. A Relation whereof was Printed, and attested to be true, by the Names of sundry credible Witnesses that saw them.

8. On April the third, 1679, Fleets and Land-Armies were seen in the air, at Ellensburg in Denmark, as if engaging each other in Battle.

9. And in the same Month and year, an Earthquake happen'd in the confines of Piedmont; and a Town called Bosc on sunk into the Earth, with neer 200 people, as the Relation thereof Printed in the Gazer assured us.

10. On

*Astrological Observations, 1681.*

10. On April 15th. 1679, an Earthquake happen'd at Lempster in Herefordshire. Or perhaps the same Earthquake which destroy'd Boscon, felt there; though not so forcibly; and though the time is somewhat different, yet Naturalists will give Earthquakes a liberty to travel, as Meteorologists will indulge to Thunder and Lightning, storms, &c. Who is so wise as to understand truly the sympathies and antipathies that the nature of things abounds with!

11. Upon June the seventh day, 1679, was seen two Moons in London, and several other places. As I received an account thereof from a Learned Physician in London.

12. On December the 20th. day, 1679, at five hours P. M. a mock-Moon was seen by many at Westminster, and in other places; and the true Moon at that time was under the Earth, I was then a close Prisoner in the Gatehouse at Westminster, and my confinement would not permit me to see it my self. But this I know, that it must needs be a mock-Moon, because the true Moon was really under the Earth, and near sixty degrees distant from the sun, as any that please may easily find by consulting the Ephemerides, and Domifying Table to that time.

Besides these several Prodigies, we have had since the beginning of Anno 1677, no less then Ten Eclipses of the Luminaries, three whereof have been Solar Deliquiums in Aries; together with two malignant Conjunctions of  $\text{♄}$  and  $\text{♅}$ , the one of them in 22 degrees of Gemini, the other in 19 degrees of Cancer; and half a hundred Oppositions and Quadrates of the Planets among themselves.

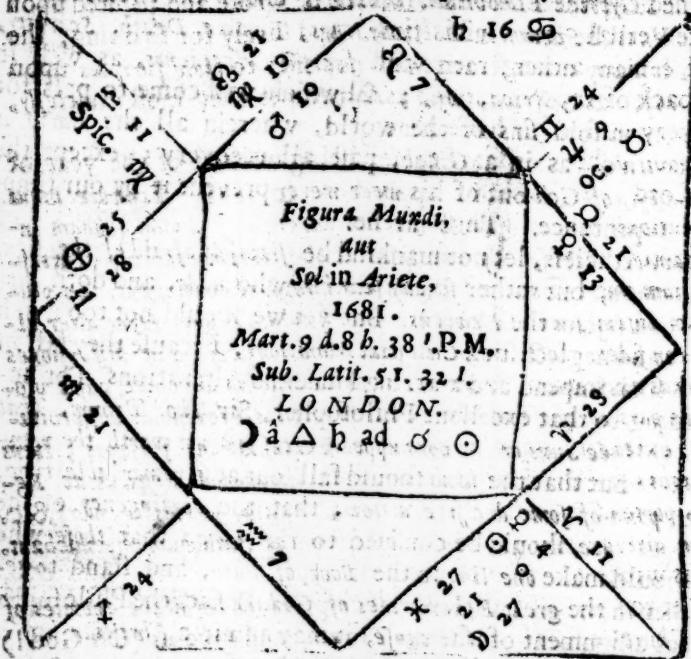

All which several remarkable Prodigies, and in so short a time, calls to my mind the Prophecy of John Cyprian, mentioned by Mr. Pugh in his Collection of British and Outlandish Prophecies, pag. 91. viz. "That the angry Heavens by Fearful Visions, fore-dooming Comets, and strange comminations of Planets do Prognosticate to the sinful world, the alterations of Christian Kingdoms, fall of Princes, overthrow of Commonwealths, Desolation of Countries, and ruin of Cities, Towns and Villages, Earthquakes, Floods, and mighty Tempests, where-  
"by

"by the whole world will be annoy'd. Also by the various  
 "course of the *Elements* all *Nations* under the circuit of the  
 "Sun will be vexed with bloody wars, Famine, Death, Scarcity,  
 "with many other strange and fearful Accidents, as well in  
 "Europe, as Africa, Asia; All which will come to pass for  
 "the manifold sins of the world, wherein all the Earth is  
 "drown'd, as in a Gulph, past all recovery; except the  
 "Majesty of God out of his meer mercy prevent it by our time-  
 "ly repentance. Thus far he.

Nevertheless, let not mankind be slavishly afraid of the signs  
 of Heaven, but rather filially fear him who made, and doth sup-  
 port and sustain the Heavens. But yet we should not too much  
 slight and neglect such Caelestial Monitions, because they fall in  
 with such stupend and amazing Mundane Alterations. For ac-  
 cording to that excellent Philosopher, Sir Tho. Brown, That  
 two or three Suns or Moons appear, &c. it is not worth the won-  
 der: "But that the same should fall out at a remarkable time,  
 "or point of some decisive action; that the contingency of the  
 "appearance should be confined to that time; that those who  
 "should make one line in the Book of Fate, and stand toge-  
 "ther in the great Ephemerides of God. Besides the Philosophi-  
 "cal assignment of the cause, it may admit a Christian appre-  
 "hension in the signality, *Pseud. Epid. p. 33.*

And we ought to have the greater apprehension of the signa-  
 lity of these apparitions, in as much as they happen from Phy-  
 sical Bodies that never grow old, or decay; the Heavens, Sun  
 and Stars, looking as fresh and vigorous this year as they did the  
 last; or indeed a thousand years ago, or at the very beginning  
 of the world. Whereas the lives of poor short-liv'd men, as also  
 of Commonwealths, Kingdoms, Honours, &c. and the whole  
 world (as the late quoted learned Author truly saith) run not  
 upon an *Axis* that still enlargeth, but on a Circle; where ar-  
 riving to their Meridian, they decline in obscurity, and fall  
 under the Horizon again. *Rel. Med. Sect. 17.*

*Astrological Observations, 1681.*  
*Of the Vernal Ingress, and Eccipses this year, 1681.*

Although I can justly say of my self with that *Trismegist* of our Age, the excellent Author of *Religio Medici*, viz. That I do not secretly implore, or wish for Plagues or Famine, or revolve *Ephemerides*, &c. in expectation of malignant Aspects, fatal Conjunctions, and Eccipses; nor yet rejoice at unwholsome Springs, or unseasonable Winters, &c. Yet it is somewhat necessary (and I know it will be expected from me) that I should say something of the ensuing year from the foregoing Figure of the Sun, his entering the Coelestial sign *Aries*. But because I would not willingly give offence to any man (my writings of late years having been subject unto very great misconstruction, and that by some Persons of no mean quality in the Kingdom; and my self also for them render'd very dangerous and obnoxious.) I will give you a brief account thereof in the words of the

earned

*Astrological Observations, 1681.*

Learned *Cyprianus Leoviti*, which he wrote and printed upon a like Vernal Figure in his time. And surely for so doing, the most envious among men will not offer to plow furrows upon the back of my Reputation, as sometimes they most causelessly, but very maliciously have done.

*Leoviti* his words are these, being written of the year of our Lord 1591, which I apply here to 1681. *Tempore huius revolutionis mundi aestus & siccitas decernit, s' cum quadam inconstantia. Nam sapias remitteretur ac pluvii temperabitur. Fortassis etiam impressiones in suprema aëris regione contingent. Ut plurimam autem simulata amicitia inter homines erunt. Hinc alter alteri non fider. Inter magnates odia nova existent, quæ dissensiones & rixas excitabunt. Unde res ad arma cruenta deveniet, cuius violentiæ pars ad quasdam liberas aut precipuas Provincias vel civitates se extendet, atque ad nonnullas Ecclesiasticas personas; Item Aulicos.----Brevitur ut dicam, multa incommoda Regibus ac Reginis portendi videntur, utpote metus, exilia, paupertas, mors, &c. Hinc alterationes publicorum officiorum ac statutorum impendebunt.* Thus wrote *Leoviti* of the year 1591.

Let the poison of these Venefick presages befall the enemies of the Church of God, and Great Britain, and give us (Oh God!) faith, truth and peace among us, in these sad, troubled, and variously disturbed times. Let such, I say, that envy *England's* Government, Quiet and Happiness, feel the sharp arrows of these Menaces; as indeed, I conceive they will, in a very great measure. Not that I can or do expect, that we in these Islands shall be wholly free from the threatenings of the present regnant angry Stars. And so I come to speak of the Eclipses which happen in this year, which I shall (for want of room) but just name.

*Of the Eclipses, Anno 1681.*

**T**HE Inhabitants of this Terrene Globe will be deprived of the light of the two great Luminaries, four times in this present year of 1681. viz Twice of the Sun, and as often of the Moon, but we shall only behold the last Eclipse of the Moon, which will be both Total and Central, the defects of the Sun (this year) being to us invisible. The

*Astronomical Observations, 1681.*

The first *Eclipse* in order will be of the *Moon* on *Febr. 22.* in 22 degrees of  $\times$ , at 11 a clock before *Noon.* Our *Antipodes* may behold it fully.

The *Second* will be a defect of the *Sun* on *March 10,* just after the *Equinox*, at our one of the clock in the morning. It happens in the beginning of *Aries*, but being invisible as to us, will not much concern us; if at least *Origanus* may be credited.

The *Third* is an *Eclipse* of the *Moon* on *August 19,* about our three in the Morning, in six degrees of  $\times$ , and this will be visible and total to us. But what have *Eclipses* in  $\times$  to do with *England*? yes, a little in *Religious* matters, because we have in this age some title to  $\cup$  in  $\times$ .

The *Last* will be an *Eclipse* of the *Sun* on *Septemb. 2,* at 3 of the clock in the Morning, in 20 degr. of *Virgo*, but it will be invisible as to us, and but a small *Eclipse* in it self. And thus much for *Eclipses* this year, 1681.

For an *Experimental* proof of *Starry Influences*, I shall present you with an account of all the  $\oslash$ s of  $\text{h} \oslash$  in *II*, since *Anno 1500*, and some of the sharp effects attending them.

1	15	Febr. 27	1502
2	25	April 9	1532
3	8	April 20	1560
4	15	May 22	Anno 1590
5	27	June 17	1620
6	14	June 28	1648
7	22	July 31	1678

1. As an effect of the first of these *Conjunctions* was the Plot of *Edmond de la Pool* against *Henry* the 7th. discover'd by Sir *Robert Carson*, &c.

2. Upon the second, the *Supremacy* of *Rome* is renounced, the *King* divorced, discontents and factions in *Religion*, some Hang'd, &c.

3. After the third, *Oneal*, &c. rebel in *Ireland*. Quarrels

in Scotland, contention between the two Queens. More discontents in Religion. The Queen opposes the Pope, and refuses to send Orators to Trent, &c.

4. Upon the fourth a War<sup>l</sup> with Spain, disturbance in Ireland, a Dearth in Italy, a Plague in Candia, Earthquake at Vienna. In England, troubles with Religious Zealots, who make great Outcries against the Bishops. Hacket's Villany, &c.

5. Great Libelling of Court and clergy. Sir Giles Monpeffon, and Sir Francis Michael degraded. Calvinists banisht Bohemia, and Jesuits expell'd the Netherlands, &c.

6. As the monstrous effects of the sixth, King Charles the first was murther'd, and several great Lords also. And when there was no King in Israel, every man did what he pleased.

7. As the sad effects of the last, England was two years and more in confusion, Religion was the Anvil upon which each Madman beat out his Frenzy. I account it little less than a shame to the Nation for me to descend to Particulars.

But because several envious men have most maliciously and falsely reported me to have had a hand in the late most Horrid Popish Plot, which is as great an Untruth as ever the Devil suggested to the belief of Mortals; I esteem it my duty to inform the world that what I Printed in my late Annual Books in relation to our National Troubles, was only an enlargement of what I published 26 years ago, in my *Celestis Legatus*, p. 98, and that only in general too. For, *Nemo particularia pradiant*. My words then of the year 1678, were these: "Now poor London thou wilt have cause to remember the grand miseries thou didst undergo in 1648, when H and C were conjoin'd in II, as now, &c. If thou canst (now) prevent the cause in the effect, be wise for ever!"

And must not those be monstrously wicked and uncharitable, that shall offer to conclude me a Plotter, and an Enemy to my King and Country, when (like an Artist only) I gave caution of dangers, and that so many years before-hand? What if I should presume to predict the like Misfortunes to attend London Anno 1708, about which time there will be another C<sup>h</sup>?

in it? I assure you, such that shall live to see that year, will find the thing too true. And as long as it continues the *Horoscope* of London, every 30 years, or thereabouts, that great City will be subject, more or less, to the like *Feverish Fits*, as in 1620, 1648, 1678, &c. And yet for this information I cannot think I deserve to be call'd, the *Popes Astrologer*, (any more than the *Presbyters Oracle*) as some very enviously and ridiculously in their *Lying Narratives*, and *Scraps of Prophecies*, have termed me. But these *Students* in the upper Form of the *Devils Academy*, think they may say what they please of

Brick-Court by the  
Deans-Yard, West-  
minster.

(Gentlemen).  
Your Contemprible, (but truly  
Loyal) Servant,

JO. GADBURY.

#### A D V E R T I S E M E N T.

**W**Hereas there are lately started up several Pretenders to Spirits of *Scurvey-grass*, we are assured that the only True Spirits thereof both Plain and the Golden Purging Spirit, are those publisht by *Rob. Bateman*, who was the first Author, and for many years hath faithfully prepared the same, being highly approved, and famous for their admirable Cures in the *Scurvey*, *Dropsie*, and several other General Distempers. To be Sold at his House in *Pauls-Chain* near *Dobsons-Commons*, London, and most Eminent Towns in the Country, with Printed Directions for their use. The Bottles are all seal'd with his Coat of Armes, the *Half-Moon* and *Ermins*, to prevent Counterfeits. Price 1<sup>s</sup>. 6<sup>d</sup>. each Bottle.

There is lately published *Thesaurus Lingua Sancta Reservatus*, &c. Being a Concordantial Hebrew Lexicon, or Dictionary, in which all the Hebrew Lexicons are succinctly comprehended; and the whole Hebrew Concordance of every word of the Hebrew Bible Grammatically resolved, &c. By *W. Robertson*. A.M. Printed for *G. Sawbridg* at the Bible on *Ludgate-Hill*.
